Zurbriggens Ridge, Mt Cook: November, 2009

Mt Cook

Zurbriggens Ridge Route

After scanning metview and conversing with Don French, we decided that a big high arriving over the Southern Alps in a few days was going to provide us with the 4 days of fine weather necessary to climb Cook from the valley floor. Immediately we booked ferry tickets and, on Friday 13th of November, we headed south.

The trip got off to a bad start with the car getting a flat tire just outside Ashburton, delaying us a few hours, but eventually we arrived at Mt Cook Village around 9 pm. By the time we sorted out our gear and visited DOC it was 10pm, with the walk to Ball Shelter taking a little over 2 hours, by 1 am it was finally time to get some much needed sleep.

Changing the tire

Bivy at Ball Shelter

After a semi comfortable night under the stars, we woke at 5 am to make our way up the Haast Ridge. The day started with a scramble down Garbage Gully, a boulder hop up the Tasman and then a tiring slog back up the moraine wall to gain a patch of tussock/grass. This led to a small rock step and a 40 degree snow slope to the true ridge, which wound up to Haast hut and then onto Plateau hut. The knee deep snow most of the way up the ridge didn't hold Scott back plugging steps for a good majority of the day, and in good time.

Lunch half way up Haast Ridge

Haast Ridge

The evening weather forecast for the following two days was clear with little wind so we decided to have a rest day. This involved a recon mission across the Plateau to the base of the route. From here we inspected the schrund, and hatched a plan to negotiate our way up the ridge between the rock on the right and numerous ice cliffs on the left. After deciding upon this, we then headed back to the Hut, making tracks for the following evening.

Grand Plateau

Start of Zurbriggen's Ridge Route

We lounged around for the remainder of the afternoon, packing our gear, and set off for the summit at 10:30 pm. The first hurdle was the schrund separating the Plateau from the ridge/east face; this was easily negotiated with a little traverse right to a solid snow bridge. The next step was the intimidating 45 degree snow slope that ends at summit rocks. The snow was in excellent condition, right the way up the 800m slope, allowing the front points to stick solidly, making for a fast ascent. After the previous day's recon mission we easily made it up the slope with no wrong turns despite it being pitch black. Due to the darkness and therefore not being able to see the drop down the face and what a fall would entail, was comforting.

Gaining ridge below summit rocks

Halfway up snow slope

After ascending 1100m from the Plateau we gained the exposed North East Ridge below the summit rocks. The time was 4:30 am and after 6 hours of near continuous climbing we stopped and rested up before tackling the crux of the climb. After 20 minutes on a cold exposed shoulder we began the ascent of the summit rocks in the dark. We decided to simulclimb to speed things up which worked well, and we found ourselves on the summit cap around 7:30 am. From there we hoped for good snow conditions to race up the summit but found hard ice and decide to pull out the rope for a second time. We simulclimbed most of the final 300m of the summit cap and finally stood on the summit of Mt Cook at 9 am. For a brief moment we stood still and gazed out over the now insignificant peaks of the Southern Alps but then realized the weather was closing in. The front, forecasted for late in the afternoon, seemed to be coming earlier, and we needed to get moving.

Summit Rocks

Summit Cap

We teamed up with another pair of climbers, who had been on the same route, to descend the summit cap, summit rocks and then the Linda Glacier. At first the clouds stayed clear but then they dropped below us as we abseiled down the summit rocks. Finally we made it to the base of them, and luckily, below the clouds which allowed a full view of the Linda Glacier. The four of us then roped up for the walk across the Linda Shelf, the run down through the gun barrels, and the zigzag plod around the numerous crevasses of the lower Linda Glacier. This all went smoothly with some expert navigation. Eventually the glacier opened up to the grand plateau, and after one final army crawl across a precariously looking snow bridge of less than a foot thick the hut came into sight, and with it the end of an epic 18 hour climb.

Halfway down Linda Glacier

Army crawl over final snow bridge

No more than an hour after returning the weather began to turn for the worse, visibility reducing to near white out and the wind rattled the hut continuously on into the night.

The bad weather lasted into the morning so we decided to have a sleep in and wait for a clearing in the conditions before starting the walk out. This was to be via Cinerama Col and the Boys Glacier. Besides the knee deep snow all went well until we came to the top

of the moraine wall. Unknowingly we wandered off down the wrong gully which led to some awkward Weet-Bix rock, down climbing. After setting off numerous mini rock avalanches, a few careful moves later we found ourselves on the Tasman Glacier looking back up to see the actual route, a gentle snow slope leading to scree slope. With that little detour behind us the final hurdle was now in sight, Garbage Gully, after ascending this and walking down Ball track the adventure was over. It was now time for a deserved pizza and beer at the Hermitage. Tired and weary we finished this off and made our way to Unwin Hut to share stories with other climbers and catch up on lost sleep from the past 5 days.

Happy to be out

Cheers to everyone who contributed to the trip in terms of research especially The Don, Nank, Terry, Paul and to Scott for being a great climbing partner. Andrew (The Canadian) and Mike Buchanan were the climbers present on the way down.

Jesse Bailey & Scott Taylor

Malte Brun

In the three years I've been in New Zealand, my success rate in the mountains has not been enviable, mostly due to the unpredictable weather conditions we all know and love. So, when the opportunity arose to spend ten days down south with Tim Steward before Christmas 2009, I was almost viewing it as the make-or-break trip - another week spent sitting in a hut in the rain and I told myself I would stop pursuing alpine climbing in NZ completely and direct my attention elsewhere.

Early signs were not promising. Reports of new snow and very high winds on the divide sent us east to the Arrowsmiths, where a fun but unsuccessful attempt was made through gullies and mixed ground on the south west face of Tent Peak, in very poor visibility and soft snow conditions.

A few days were spent thumb-twiddling in Christchurch before the promise of a decent high pressure system had us scuttling across to AMC National Park. The inside line from a contact in the village was that Malte Brun was still plastered in snow following the recent storms, and a plan was hatched to attempt a traverse of the mountain - up the south face and down the "classic" west ridge.

Access to the Beetham was raised as a potential obstruction, but in the event the approach to our high camp on Malte Brun Pass from the Ball Shelter road, achieved in a day and a short morning, was without incident.

The West Face of Malte Brun

Typical, moderate climbing on the South Face

Finding the route "Rightside Direct" to be incomplete in the lower section, we opted for the "Zig Zag" line, which gave 600m of sustained but straightforward frontpointing on snow

and snow ice, with occasional mixed steps and a long pitch of thin, 75-85° ice with sparse protection providing the technical interest.

Following a break to melt snow, and some premature celebratory text messaging, we began the long descent of the west ridge. This proved to be more time-consuming than expected, with my lack of recent time on the rock adding significantly to the proportion of the route being pitched as we downclimbed.

A jammed abseil rope as we dropped north off the ridge cost more time, and as we poked around in the failing light, trying to link up snow fields interspersed with loose rock bands, the decision was made to spend the dark hours making drinking water, and to sit it out on a ledge until daybreak. With daylight everything made more sense, and a couple more sneaky abseils - which we would never have worked out in the dark - saw us gain continuous snow slopes leading to the top of the Malte Brun glacier, and thence the easy traverse back around to the lower Beetham.

Having done our best to rehydrate courtesy of the Beetham stream, we slid and sketched our way back down the moraine to the Tasman, and back out to the van by 9:30 on the evening of the fourth day, dehydrated and pretty well wasted. We certainly knew we'd been out. The return to Mt Cook village, sign-out at DoC, and long, entertaining drive back to Christchurch (complete with hallucinations and imaginary music) saw us finally hit the sack at 4:30am, before the alarm went off again at 6:30 so I could catch my flight back to Wellington. All in all a great little adventure, and definitely enough to rekindle my enthusiasm for NZ mountaineering.

Climbers: Tim Steward and Max Gough, trip report by Max Gough

Tim traversing the Cheval on the descent

Mangaokewa, December 2009 and January 2010

I'll be leading a club trip to Mangaokewa on the 27th / 28th February so I figured a quick recce (or two) would be sensible to make sure I can actually find the crag. With that in mind I spent a weekend there with Reece Geursen and Clare Thomson in December, and went back for another weekend with ShiChang Hou, Erin Macri, and Marcus Manning in January.

Mangaokewa is just out of Te Kuiti – close enough to easily duck into town for a coffee in the morning. The crag has free camping, flush toilets, and tap water. It's all pretty civilised and makes for a comfortable weekend.

The Wall of Teeth – steep, sunny, stalactited

Marcus plays on Angry American's stalactites

The rock itself is, well, *steep*. There are probably a total of half a dozen slab climbs, a handful which are vertical, and the remainder are overhanging. This makes for strenuous climbing and some finger poppingly high grades, with very few routes under 18 or 19. That said, the limestone can be highly featured so there are quite a few jug hauls to be found, and it's worth bearing in mind that the grades are generally softer than other crags. The climbing is entirely sport, and for the most part the bolting is pretty tight.

The one down side to Mangaokewa is that a lot of the routes are pretty dusty. The crag was only established a couple of years ago, new routes are being cleaned and bolted all the time, and the overhanging nature of the rock means that it doesn't get washed down by the rain. Bring a brush. On the plus side, the crag stays dry in the rain. Great stuff given this summer's weather!

Hopefully these shots will pique your curiosity and we'll see you there at the end of February. There are two online topos: www.scribd.com/doc/17352563/Mangaokewa-Guide and www.freeclimb.co.nz/uploads/24379/pdfs/Mangaokewa.pdf. Send me an email at sm@nzalpine.wellington.net.nz to sign up for the trip.

Late afternoon at the crag (image courtesy of Marcus Manning)

Barratts Hut, Hapuku River, Kaikoura Mountains.

Several years worth of entries from the log book from the old hut (illustrated here) have been typed up and returned in a folder to the hut. The old hut still stands, with a new-ish DoC bivvy nearby.

Tony Gates.

From the hut log book

20/6/92

Don French, NZAC Wgtn.

In from road end yesterday. Came up gorge. Got caught in quicksand. Fortunately could get pack off & get snowshovel out to help dig myself out. Was almost up to my waist in sand. Much snow about. 10 cm about the hut. Heading up Surveyor Ridge-camp. Look at Manakau - Te ao Whekere traverse - & exit out this river system. Wx excellent, B dropped 60 ms overnight. Looks good for a couple of days.

21/6/92. Back 5 pm from Manakau. Surveyor Ridge was a battle. Snow almost to sea level! Bitterly cold yesterday- but warmer today. Two perfect days. Had problems with butane stove - froze up. Out tomorrow am.

SHORT CUT at 1930 m point on Surveyor Ridge, do descending traverse (west side) into high basin- good, sheltered camping. Saves at least 1.5 hrs. Ascend onto Manakau ridge by obvious gully system. Watch for avalanches.

More from the Barratts Hut log book

Barratts Hut

This poor old hut has seen better days
What tales its slabs could tell
Of musters, perhaps looking for strays
A possumer or two as well.

And what of the hunters, looking for deer?

How many sheltered inside?
A hut like this can really bring cheer
When its raining and blowing outside.

I couldn't leave it alone to dye
So I've fixed up a thing or two
It's not like Noah's, but at least it's dry
I hope it's useful to you.

By a friend of Barratts Hut.

Barratts Hut - built about 1940 from materials packhosed in. Hut served mustering activities for grazing lease, since surrendering to Manakau Scenic Reserve.

River sliding by
Mountains reaching high
Catches vaulting sky

Valley's steeping wall
Answers kea's call
In mountains resound hall.

Steadfast rock persists
Through time's ancient mists
'till tourists blighted kiss.

Akula

UPCOMING CLUB TRIPS

Wellington Section Trips

Trips are a key part of the Wellington Section. Trips can be of any length, any level of difficulty, and any size. Simply email us or approach us at the monthly meeting, and we can help you get going. Send your trip ideas, no matter how vague, to trips@nzalpine.wellington.net.nz

Mangaokewa

Date: 26-28 February 2010

Leader: Steve Minchin

Level: Rock grade 18-30

Come sample the steepness! Mangaokewa offers overhanging sport climbing, with 70 routes mostly in the 18-23 range - this probably isn't a trip for absolute beginners but it should be a good weekend away for those who climb like monkeys... The crag is just out of Te Kuiti and offers free camping, flush toilets, BBQ pits, and a river, so it should be a great place to hang out if the weather is nice. If the weather is rubbish then no worries - the cliffs are overhanging so if you want to stay dry, you'd better keep climbing. Contact Steve at 021 127 3925 or email sm@nzalpine.wellington.net.nz

Wharepapa South

Date: 12-14 March 2010

Leader: TBA

Level: Rock grade 12-25

Outstanding chance to climb on a wide variety of mid-graded ignimbrite (volcanic rock). An exciting mix of bolted and trad routes 55km south of Hamilton. We'll plan to camp in the area leaving Wellington after work on Friday. Contact Kevin at 934 0975 or by email at kp@nzalpine.wellington.net.nz

Arrowsmiths from the Lawrence

Date: 1-5 April 2010 (Easter weekend)

Leader: TBA

Level: AIC Graduate and 0-3 years experience

Chance to use some of those lazy last days of the autumn before the first of the snows come in. Walk in will be from Erewhon. The rock is better on western side of the Arrowsmith range. Friday High Camp, Saturday Summit, Sunday Spare Day, Monday Walk Out, Tuesday drive home. There exists the potential for doing a new rock route so bring your cams! Contact Kevin at 027 687 9573 or by email at kp@nzalpine.wellington.net.nz

Whanganui Bay

Date: 23-25 April 2010

Leader: TBA

Level: Rock grade 16-25+

Come join us for a weekend of sport and trad climbing at Whanganui Bay. Plan is to leave Wellington after work on Friday evening and tent for 2 nights at the Bay. With over 1000 routes to choose on classic ignimbrite rock adjacent to the beautiful Lake Taupo from this is truly the Mecca of North Island rock climbing. Try yourself out on the Whakenui classics of Small Pocks (19, sport), James Stirling Direct (17, trad), and the three pitch chimney climb Tibia (16, trad). Contact Kevin at 934 0975 or by email at kp@nzalpine.wellington.net.nz

Kawakawa Bay

Date: 7-9 May 2010

Leader: TBA

Level: Rock grade 13-22+

Take a trip to the newly developed crags of nearby Kawakawa Bay. Come along for a weekend of sport (and some trad) climbing on some quality rock, against the backdrop of the largest lake in the North Island. Explore the large number of mid-grade climbs available including the classic 2 pitch High Hopes (16). Hone up on those rock skills with some full pitch climbs. Contact Kevin at 934 0975 or by email at kp@nzalpine.wellington.net.nz

Mt Tapuae-o-Uenuku

Date: 4-7 June 2010 (Queen's Birthday weekend)

Leader: TBA

Level: AIC Graduate and 0-3 years experience

Opening alpine snow trip for the winter season! Come climb the second highest peak in NZ outside the Mt Cook area. This was one of Hillary's early climbs back in the 1940's, except instead of doing it in 1 day like Sir Ed did we'll take 3! On Friday night we'll take the ferry and stay near the road end. Saturday will be the trip in up the Hodder River to stay at the Hodder Huts – some 66 crossings! On Sunday we'll attempt a summit via the traditional north ridge. No ropes required. Contact Kevin at 934 0975 or by email at kp@nzalpine.wellington.net.nz

Ruapehu South

Date: 9-11 July 2010

Leader: TBA

Level: AIC Graduate and 0-3 years experience

On Friday night we will drive up to Ohakune and either tent near the mountain road or stay at the backpackers. Saturday we will ascend the highest point on Ruapehu = Taurangi peak (2797m) returning for a pub meal at the Powderhorn in the evening. On Sunday we will attempt Girdlestone (2658m), the outlying peak on the right of Taurangi by crossing the Mangaehuehu Glacier. Contact Kevin at 934 0975 (evenings) or email me at kp@nzalpine.wellington.net.nz.

NOTICES

3rd edition - Mount Aspiring Region Guidebook

The new 3rd edition - Mount Aspiring Region a guide for mountaineers by Allan Uren and John Cocks is now available. Published in November 2009 to celebrate the centenary of the first ascent of Mt Aspiring.

Member price \$30 gst inc (RRP \$40 gst inc) – more details and a link to place online orders here: <http://alpineclub.org.nz/product/the-aspiring-region-southern-alps-guide>

The special that is running on the last (2nd) edition, will continue until limited stock runs out. To remind you, that special is: Two Mt Aspiring (2nd edition reprints) for the price of one or purchase either the Mt Cook, or Darran's guides and get a Mt Aspiring (2nd edition reprint) for only \$10 extra. Post and packaging extra.

Westland Tai Poutini National Park 50th Reunion

The Westland Tai Poutini National Park 50th Reunion is being held at the Franz and Fox starting on the Friday night and main evening event at the Franz Sat night (March 26-28th March 2010). For further details see <http://www.doc.govt.nz/getting-involved/in-your-community/events/regional-events/west-coast/50th-anniversary-westland-tai-poutini-national-park/>

Hut fees

It has been brought to the NZAC's attention that two SI guiding companies have been charging NZAC members non-member rates for their hut fees when travelling with a guided party. The excuse given was that they, in turn, paid NZAC the full non-member rate. I have looked at payments received from both the companies named and this is definitely not the case. NZAC only receive either the member or non-member rates depending on a person's membership status. When booking with a guiding company we suggest that members make sure they advise them of their NZAC status to ensure they are only charged the NZAC rate for use of the Club's huts, or for DOC's alpine huts.

Please be advised that no active New Zealand Alpine Club member should be told they have to pay non-member rates and if asked, should refuse to do so. If they find they have no option but to pay the higher amount, they should inform the Club as soon as possible so that we can contact the company involved to request an immediate refund of the overpaid amount.

New Zealand Alpine Journal

The National Office wishes to advise that the price for an annual Journal Subscription will increase this year by \$5. This price increase will not affect membership fees, only Journal subscribers. The 2010 Journal will increase in price for individual sales to \$25 members, \$35 non members, plus p&p. The current 2009 edition is still available for sale at the old price and can be purchased via <http://alpineclub.org.nz/product/new-zealand-alpine-journal>

Revalidating NZOIA / SKOANZ qualifications

If you have NZOIA or SKOANZ qualifications but have not revalidated them, you need to join the revalidation and registration process. Annual Revalidation Forms are available on the NZOIA www.nzoia.org.nz

Nepali climber – NZ contacts required

Jim Watt, a former member of the Alpine Club in Wellington, is looking at bringing a young friend from Nepal over later in the year to experience NZ. He is a climbing guide and summited Everest 2009 and is due to go again this year. Jim is looking for contacts who can give his friend a "New Zealand experience" in the mountains. Please contact Jim Watt (email: jim@nzcc.net.nz)

Waikato Tramping Club 60th Birthday Celebrations

We invite past members to join us to celebrate our 60th birthday on 15-16 May 2010. Please send your contact details to us and the contact details of any other past members you know.

Waikato Tramping Club 60th

PO Box 685

Hamilton 3240

Email: wtc60th@paradise.net.nz, Website: www.wtc.org.nz

Visiting American climber

I am a member of the American Alpine Club, and will be travelling to NZ in November 2009 – February 2010. I'd like to hook up with NZAC members to find partners for alpine and trad climbing. I'll be focusing on the Otago and Canterbury areas, roughly Queenstown up to Arthur's Pass, and maybe a bit in the Darrans.

Cheers, Mike (zarmot@yahoo.com)

Member discount – Ramset tru-bolts

Ramset are now offering NZAC members a 65% discount on 10 and 12mm stainless steel tru-bolts at all their stores, nationwide. To view a list of outlets visit their website: www.ramset.co.nz/trade_centres.html

Auditor wanted

After sterling service Paul Clarke has stepped aside as auditor of the Wellington Section's accounts, so we are looking for someone to help out. If you are interested, or know of someone who might be, drop a line to treasurer@nzalpine.wellington.net.nz

Climbing, walking, or ski mountaineering in Europe in 2010?

The Club is considering trialling a new facility in 2010 for NZAC members, under which they will be entitled to reciprocal rights (members' fees) at huts and refuges in the Alps, the Pyrenees and other mountain areas such as the Dolomites and Picos de Europa. This would apply to literally thousands of huts managed by the Swiss, Austrian, French, Italian and German Alpine Clubs and the Spanish Mountaineering Federation.

Hut fees in Europe are expensive, not least because the facilities are distinctly more luxurious than in NZ huts. Currently NZAC members are not entitled to discounts at these huts. The fact that NZAC is a member of UIAA (World Mountaineering Federation) cuts no ice. Very occasionally, reduced fees are given by generous hut managers on presentation of a current NZAC card but that's good luck and unwise to rely on.

For those staying in huts for more than a few nights buying a reciprocity stamp through the Club, which will be attached to the NZAC membership card, will result in substantial savings on hut fees and, in some cases, reductions in the price of meals served at the huts.

Under the European agreement NZAC has been granted the right to issue these stamps in conjunction with the clubs and federations named above. The question is whether there will be enough interest to justify NZAC setting up this facility. Based on current rates of exchange the costs of a reciprocity stamp for a calendar year to an NZAC member is likely to be between NZ \$80 and NZ \$95.

We would like to get an indication of the likely interest from members in this scheme. Without any commitment on your part, please indicate whether you are likely to be interested in obtaining a reciprocity stamp for Europe for next year (2010) by emailing or calling John Nankervis (NZAC's current UIAA rep). John would welcome any other comments on the proposal.

Email john.nankervis@buddlefindlay.com or phone (04) 3850415 (H).
